

AN OFFICIAL STATEMENT

About the organization and carrying out

the IV International congress

"The collection, storage, processing and waste utilization are the most important components of environmental safety and sustainable development of Russia"

The IV International congress "The collection, storage, processing and waste utilization are the most important components of environmental safety and sustainable development of Russia" will take place on June 9-10, 2016 in Moscow in MIIT Palace of culture by the address: Moscow, MIIT Palace of culture, Novosushchevsky Lane 6, bld. 1 on the approval of the Deputy Prime Minister of Russia Arkady Vladimirovich Dvorkovich.

The organizers of the event are: Russian and International Engineering Academies, an Autonomous non-Profit Organization "International center for promotion of enterprises for processing of oil-slime" (ANO "IUEPO"), Moscow state University of railway transport (MSURT-MIIT), the Agency of Strategic Programmes, the Union of oil & gas producers of Russia. The Congress will be held with the official support of the Ministry of natural resources and ecology of the Russian Federation, the Ministry of energy of the Russian Federation, the Russian Academy of Sciences, the Committee on energy policy and energy efficiency of RSPP, Committee on energy strategy and development of FEC of the CCI of the Russian Federation, Russian state University of oil and gas named after I. M. Gubkin, Russian Peoples' Friendship University (RUDN), the all-Russian Public organization "Business Russia".

Ecological safety of Russia is one of major factors of development in a number of branches of an industrial complex at the present stage. Today, on the eve of 2017, declared the Year of ecology, it is very important to consolidate efforts within the professional discussion and active information campaign directed to the best understanding of the increasing

environmental problems and practical realization of the concrete measures directed to their decision.

There will be the following questions in the business program of the Congress:

- The analysis of the new state environmental policy in the field of oil and gas production, oil processing and petrochemistry, timber, agricultural problems (legislative regulation, investments into projects).*
- The analysis new the state environmental policy in the field of power engineering, construction, transportation problems (legislative regulation, investments into projects).*

The following round table discussions are planned during the work of the Congress:

The problem of disposing of waste in transport

Issues of recycling in timber industry

The problem of disposing of waste in agricultural production, new offers and technologies

Modern technical and technological capabilities, economic aspects of collecting and

processing of oil slimes. Cleaning of reservoirs and bioremediation of the land plots

Modern technical and technological possibilities of processing of plastics and rubber products

- Issues of waste utilization in construction, development of normative documents for the separate collection of municipal solid wastes , their disposal and recycling*
- Investment appeal of projects of processing of oil-containing, construction, agricultural and other categories of waste for the financial and investment organizations*
- A separate session will be devoted to the introduction of the environmental innovations in the "Russian Railways" company.*

Heads and representatives of the profile ministries and departments, key experts of the branch unions and associations, heads of scientific and public organizations, heads of the industrial enterprises and organizations, representatives of business community, financial credit institutions and the specialized organizations will take part in the deliberations of the Congress.

The IV International congress is a unique platform for meetings, exchange of experience and opinions of the companies the result of whose activity is waste production and the enterprises for the collecting, storage, processing and utilization of it. The Congress continues a number of the events held in 2007, 2011, 2012, 2013 and 2015.

More than 300 delegates from Russia, Europe, America, Canada, the countries of Asia plan to take part in the work of the Congress.

The recommendations prepared during the Congress will be submitted to the Administration of Russian President, Russian Government, Federation Council and State Duma of the Federal Assembly of the Russian Federation to promote the formation in Russia of an integrated system of waste processing in the field of power engineering, petrochemical and other industries with hazardous industrial waste.

*The organizing Committee of the IV International congress "**The collection, storage, processing and waste utilization are the most important components of environmental safety and sustainable development of Russia**" invites all interested organizations to take part in the work of the Congress and a **specialized exhibition**.*
